HOW TO START

- 1. Get a collection container** like an empty yogurt tub or a small pail. If you'll be dropping off food scraps, a 5-gallon bucket with a tight-fitting lid works well for transport.
- 2. Line your kitchen pail** with a paper towel, newspaper, leaves or a certified compostable bag to keep it cleaner. Layering food scraps with paper towels or coffee grounds helps control odors.
- 3. Choose a removal method from the column on the right.**
