

Volume and Weight Considerations for 2 CUBIC YARD MINIMUM

Average Weight of 2 cubic yards	
Compost	3,600 lbs
Topsoil	6,000 lbs
Garden Mix	4,000 lbs

Examples of trucks we **WILL NOT** load 2 cubic yards into:

- Tacoma
- Ranger
- Colorado
- Ridgeline
- Silverado
- Titan
- Ram
- Tundra
- Most pick-up trucks

Examples of trucks we may load a minimum of 2 cubic yards into:

- F-350, 450, 550
- Single-Axle Dump Trucks
- Tandem Trucks
- Most Dump Trucks

Trailers- Most trailers have a VIN Label that states loading weight capacity. This can be found on the forward half of the left (road) side of the unit. Also, keep in mind that 2 cubic yards is quite a bit of volume, so even if your trailer can hold the weight, it might not be able to fit 2 cubic yards. Below is an example of a trailer carrying 2 cubic yards of product. Trailers smaller than this are not recommended.
